

Multi-Function Overcurrent Relay

Argus-M

The **REYROLLE** Multi-Function Argus-M is a new generation of non-directional & directional overcurrent protection relays designated 7SR21 & 7SR22. The relays are the latest development of overcurrent protection & build on years of numeric relay protection experience with the 'ARGUS' family of products. Housed in 4U high, size E6 or E8 cases, these relays provide protection, control, monitoring, instrumentation & metering with integrated input & output logic, data logging & fault reports. Communication access to relay functionality is via a front USB port for local PC connection or rear electrical RS485 port for remote connection.

One relay fits all

- > Universal Auxiliary Voltage 24 to 250Vdc
- > Universal Binary Input Voltage 24 to 250Vdc
- > Dual CT Inputs 1A & 5A
- > Selectable IEC60870-5-103, Modbus RTU, **DNP3.0 Protocols**
- > Additional Rear Communication Port Options
- > Programmable Tri-Colour LEDs
- > Programmable Function Keys
- > Selectable EF/SEF Inputs
- > Selectable True RMS or Fundamental Operation
- > Virtual I/O
- > Quicklogic
- > Fully Withdrawable Design

Product news

Argus-M-7SR22 Multi-Function Overcurrent Relay

- > 37 Undercurrent
- > 46BC Broken Conductor
- > 46NPS Negative Phase Sequence Overcurrent
- > 49 Thermal Overload
- > 50BF Circuit Breaker Fail
- > 64H High Impedance REF
- > 74TCS Trip Circuit Supervision
- > 81HBL2 2nd Harmonic Block/Inrush Restraint
- > 27/59 Under/Over Voltage
- > 47 Negative Phase Sequence Voltage
- > 51V Voltage Dependent Overcurrent
- > 59N Neutral Voltage Displacement
- > 60CTS CT Supervision
- > 60VTS VT Supervision
- > 67/50 Bi-Directional Instantaneous Overcurrent
- > 67/50G/N Bi-Directional Instantaneous Earth Fault/SEF
- > 67/51 Bi-Directional Time Delayed Overcurrent
- > 67/51G/N Bi-Directional Time Delayed Earth Fault/SEF
- > 81 Under/Over Frequency
- > 79 Autoreclose
- > 21FL Fault Locator
- > 25 Check Synchronising
